

Marble Polishing Services

Just like carpets, marble floors need to be maintained as well. Without any marble flooring maintenance, these delicate floor coverings can collect surface dust easily.

Consequently, the marble can become dull and stained, causing harm to the overall appearance of the flooring. Marble floors are aesthetically beautiful but they do require special attention and cleaning materials to not damage them.

Specialized Marble Floor Cleaning Techniques

Without proper care, marble floors may need to be repaired to ensure their longevity. Our marble floor polishing technicians have been specially trained in the state-of-the-art equipment and the special method used by Big Red. The polishing system we have in place basically removes a thin layer of the marble to produce the desired sheen. This is unlike the conventional marble polishing method which uses a diamond-coated pad to sand the marble.

Our technique is less abrasive on the marble, quick, dust free and most importantly – it produces quality results!
